

PRESS RELEASE – September 4th, 2025

Jekko research partner of Center Construction Robotics

Confirmed the partnership between Jekko and the University research center for new projects on digitalization and automation of construction industry

**CONSTRUCTION
ROBOTICS**

Jekko confirms its collaboration with the **Center Construction Robotics (CCR)**, a leading research hub within the **Construction Cluster at RWTH Aachen Campus**. Started with the joint MAXX project, this renewed commitment highlights Jekko's dedication to innovation and its ongoing contribution to advancing digitalization and automation in the construction industry.

At the **Open-Campus-Week** event held on **August 26–27, 2025**, with European research partners from academia, industry, associations, and politics, Center Construction Robotics celebrated its achievements and outlined the upcoming initiatives.

The event also marked the celebration of the **bauma Innovation Award 2025** in the **Research** category, awarded to **MAXX – Mobile**

Assembly X-System. This pioneering project, presented at **Bauma 2025 at the Jekko stand**, was developed by CCR in collaboration with the German Government and industry partners including **Jekko, KUKA, and Fundermax**.

By confirming its role as a research partner, Jekko will continue to work alongside CCR and its network to tackle critical industry challenges such as **material reuse**,

digitalization, and automation, while developing sustainable and future-oriented solutions for the construction sector.

“We are proud to extend our partnership with CCR and to keep contributing to innovative projects that shape the construction industry of tomorrow,” said Diego Tomasella, Jekko’s CEO.

This ongoing collaboration strengthens Jekko’s position as a forward-looking company, committed to **research, innovation, and sustainable growth** in the global construction equipment market.
