

PRESS RELEASE – September 25th, 2026

Jekko and Transgrúas win “Best Mini Crane” at the PEM Awards 2026

Jekko and its Spanish dealer **Transgrúas** have once again been recognised at the **PEM – Premios Elevación Movicarga 2026**, winning the award for **Best Product of the Year in the Mini Cranes category** (Mejor Minigrúas) with the Jekko **SPX1280**.

Presented during the awards ceremony held in Madrid on 24 September, the recognition confirms the SPX1280 as one of the leading solutions in the compact lifting industry, combining an 8-tonne maximum lifting capacity with advanced stabilisation technology, compact dimensions and outstanding versatility.

This latest achievement marks the fourth time a Jekko mini crane has won this prestigious award. The SPX1280 follows the SPX650 in 2021, SPX328 in 2022 and SPX532.2 in 2025, strengthening Jekko's track record at the PEM Awards and underlining the continuous evolution of its SPX range.

Ian Trenzano, Sales Director at Transgrúas

“Winning this award for the fourth time is a great recognition of the work carried out by Jekko and Transgrúas over the years. It confirms that continuous innovation and a strong understanding of the market are the right path forward. We are very proud to bring Jekko technology to our customers in Spain and to share this achievement with the entire Jekko and Transgrúas teams.”

The award also celebrates the long-standing partnership between Jekko and Transgrúas, Jekko's official dealer in Spain, combining Jekko's continuous product development with Transgrúas' extensive knowledge of the Spanish lifting market.

Four awards, four generations of Jekko mini cranes, and one shared commitment to keep raising the standards of compact lifting.
